1.OUR HISTORY

First Generation in the 1860s
First cotton production for export in Türkiye.

Second Generation in the 1900s
They continued agricultural production with different products using modern methods and machinery.

Third Generation in the 1930s
They continued agricultural production with new projects for agricultural production and irrigation by our agricultural engineers.

Fourth Generation in the 1980s
They continued agricultural production with new projects, contract farming, and certified production using new methods.

Fifth Generation in the 2010s
Güven Agro Kimya Tarım San. ve Tic. Ltd. Şti., whose main sectors are plant protection chemicals, fertilizers, plant nutrients and agricultural production, was established in Adana in 2011. Güven Global Tarım San. ve Tic. A.Ş. Our company, whose main sectors are agricultural production, plant nutrition and seed production, was established in Istanbul in 2022.

2. ABOUT OUR COMPANY

Güven Global Tarım San. ve Tic. A.Ş. is an agricultural company established with the Güven family's experience of over 160 years in the agricultural production and agricultural products' trade.

The headquarters of Güven Global Tarım San. ve Tic. A.Ş. is in Istanbul, and the headquarters of Güven Agro Kimya Tarım San. ve Tic. Ltd.Şti. is in Adana.

Both companies are group companies belonging to the Güven family, who have over 160 years of experience in the agricultural sector in Turkey.

The fields of activity of Güven Global Tarım San. ve Tic. A.Ş. are agricultural production, food production, trade of agricultural products and processed goods, fertilizers, plant nutrition, seed products' production and the export and import of all these products.

3. OUR BUSINESS AREAS

AGRICULTURAL PRODUCTION

We are producing and exporting many agricultural products of industrial crops, fruits and vegetables by sustainable methods with certificates

SEEDS

We produce, import and export seeds such as cotton, wheat, peanuts, forage, legume, vegetables

We have also have partnership by some companies such as Pioneer, LG, Dekalb for maize-corn and sunflower seeds

BIOSTIMULANTS

We produce and export biostimulants, we research and develop new products by using AI

Biostimulants are plant and animal extracted based materials used instead of plant protection chemicals and pesticides and to obtain higher yield with lower prices in unit area

PLANT NUTRIANTS

We produce and export plant nutrients and import some of their raw materials

PLANT PROTECTION CHEMICALS

We produce and export plant nutrients and import some of their raw materials

PARTNERSHIP FOR AGRICULTURAL PRODUCTION

We both produce in our agricultural areas and organize agricultural crops production with farmers for sustainable production and high qualified supply for industrial companies and retailers

FOOD and COTTON PRODUCTION and EXPORT

We produce, supply and export agricultural products and crops and foods
